

# Grote XTL Flexible LED Lighting

[Click for APS Website](#)

XTL LED Light Strips are the only extremely thin and extremely flexible light strips that are rated for outdoor use.

Create special lighting effects for virtually any application with XTL<sup>®</sup>, a family of flexible, light weight, ultra-thin LED lighting strips. Available in white, extreme white, blue, red, and green, durable XTL<sup>®</sup> strips can twist and conform to most surfaces to provide direct or indirect light.

## New Grote XTL LED Technology Truck Bundle

When you demand performance, grab the new Grote XTL LED Technology Truck Bundle. This kit provides the most light of any 18" flexible LED on the market today. Boasting over 250 lumens the strip will easily light up the back of your truck and the included battery pack boasts an extreme 1.5 million cycle switch along with the most extreme mounting tape too-3M VHB tape designed specifically for metal and powder coat surfaces. All this means the light and battery box might last longer than your truck!

Only Grote could revolutionize LED technology with one extremely thin light-and make it extremely flexible and durable, too. No matter what type of truck you have, the XTL LED Technology Truck Bundle will provide years of clear, white light to help light up dark truck beds on those late night trips.
