

Speaker A523BLU

10" x 7" Blue LED Safety Light

Description

An adaptation to the popular A523 LED construction work light, the A523BLU is an LED safety spot light, designed to project a bright, blue beam pattern on the ground to serve as a visual warning indicator. Similar in function to the Model 770 BLU LED safety spot, the A523BLU projects a much larger and more powerful beam pattern, ideal for applications such as cranes or other tall equipment where the light needs to travel a further distance without sacrificing on intensity.

This innovative lamp features a large (7" x 10") bank of optics and a self-contained, rugged die-cast safety yellow-coloured aluminium frame with an adjustable mounting bracket.

Features and Benefits

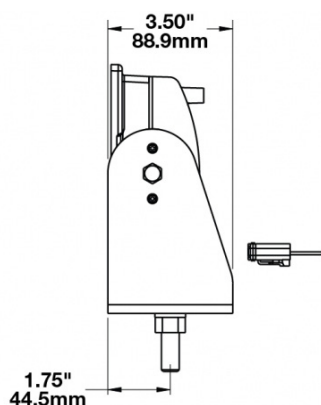

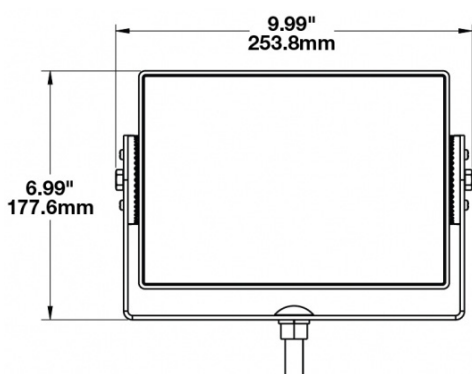

- Blue LED safety light ideal for increasing awareness around equipment and other safety zones
- Projects a bright blue, spot light beam pattern on the ground as a visual warning
- Tough, yellow-coloured die-cast aluminium housing for maximum protection
- Adjustable indicator hubs on either side allow for precise aiming

Applications

Agriculture, construction, industrial, mining, railroad, specialty, trucks and buses
