

PREVIEW® PLUS

Integrated Blindspot Safety System

PRECO™
ELECTRONICS

Description

All-in-one Safety System Integrates Vision with Active Blind Spot Detection

- Combines best in class active blind spot detection radar with visual clarification camera and in-cab monitor
- Monitor supports up to four cameras and 24 sensors for complete coverage
- Automatically switches to single screen view where detection occurs (multi-sensor and camera configuration)

PreView Plus provides operators with a heavy duty, all-in-one safety system. By integrating a camera and monitor with Preco's patented radar sensor, operators have a single solution for active blind spot monitoring. PreView Plus supports up to 4 cameras and 24 sensors for 360° vehicle coverage.

Learn how you can achieve more than 75% reduction in backing accidents like other PreView customers report by starting your pilot project today.

Features and Benefits

- Provides single point of focus for driver by integrating detection indicators directly on to the monitor.
- Supports up to 4 cameras/views and 24 sensors for 360° blind spot coverage
- Monitor's menu buttons simplify pairing sensors with a camera
- The driver has the ability to silence the audible alert by pressing a key on the monitor panel. This allows the driver to visually clarify the object is not a threat and silence the alert so it won't become an annoyance.
- When the vehicle is put into reverse, the monitor will switch to full screen showing only the rear camera view (regardless of any detections on other sensors).
