

True North Brush Shirt (FR Fabric)

Protective Fire-Resistant (FR) Clothing

Description

Protective fire-resistant (FR) clothing for firefighters, welders / boilermakers, and personnel that require high thermal protection. The True North Brush Shirt is an NFPA 1977-compliant shirt constructed from inherently flame-resistant fabrics and is designed for use by wildland firefighters and any personnel that need to be safeguarded from thermal or fire exposure.

The shirt is designed to be durable enough to endure thick brush. It features two front chest pockets hook-and-loop closures and a third pocket on the left sleeve with a convenient pen slot. Hook-and-loop closures are also located at the wrists to adjust the sleeves to a comfortable fit around gloves and keep dirt out. In addition, the collar can be worn up and closed, or down and open.

Available in Plus or Pro

The shirt comes in two versions – Plus and Pro, The “Plus” version is constructed with 5.8 oz Tecasafe® FR fabric and the “Pro” is made with 6.0 oz Nomex® FR fabric.

Features and Benefits

- Inherently flame-resistant
- Two chest pockets with hook and loop closures
- Adjustable hook and loop cuff closures to keep dirt out
- Convenient sleeve pocket with a pen slot
