Guardian™

The Guardian™ is a versatile light that fits any worksite situation. With the ability to switch from steady on to flashing, the Guardian™ is able to keep visibility a constant. Clip an extra light onto the back of a workmen's helmet and eliminate visibility worries. Included is a utility clip that can be attached anywhere, including jackets and helmet retention straps. Can be used in conjunction with any of the Guardian™/ Guardian Trident™ accessories.

Guardian, Black Base, Yellow, Dual Function 54000

Guardian Expedition, Black Base, Red, Dual Functions 54001

Guardian Expedition, Black Base, Blue, Dual Function 54002

Guardian Expedition, Black Base, Green, Dual Function 54003

Guardian Expedition, Black Base, White, Dual Function 54004

Comes with Utility Clip

Rotate Lens to Turn ON or OFF

Flip Battery to Change Functions

STEADY-ON

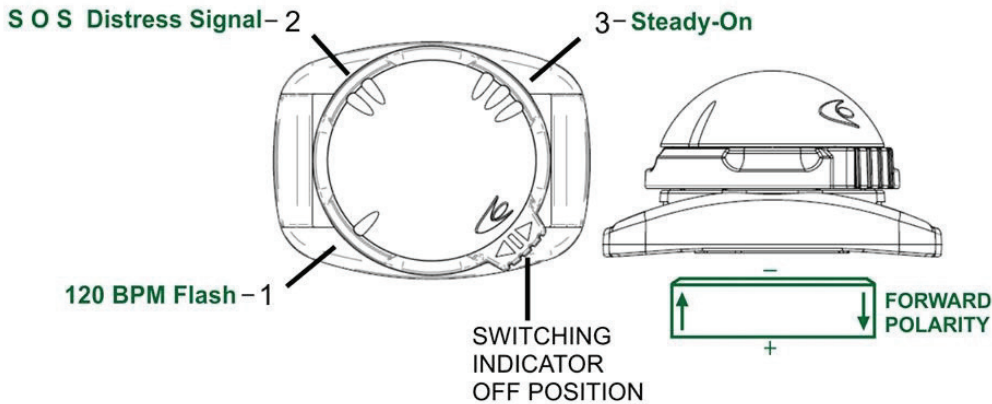

FLASHING

Guardian Trident™

The Guardian Trident™ has the same ease and functionality as the Guardian™; however, instead of having to flip the battery over to change from steady on to flashing, there is an intuitive rotating bezel, adding a third feature of SOS flashing. Allowing for visibility at all times and the ability to change light functions with ease, the Guardian Trident™ is perfect light for all worksites. Included is a utility clip that can be attached anywhere, including jackets and helmet retention straps. Can be used in conjunction with any of the Guardian™/Guardian Trident™ accessories.

Accessories

The Guardian™ is a versatile light that fits any worksite situation. With the ability to switch from steady on to flashing, the Guardian™ is able to keep visibility a constant. Clip an extra light onto the back of a workmen's helmet and eliminate visibility worries. Included is a utility clip that can be attached anywhere, including jackets and helmet retention straps. **Tag it, Green, Dual Function
51013**

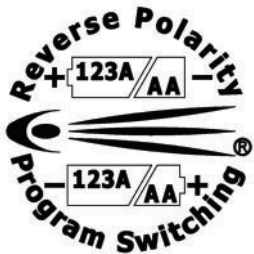

**Tag it, White, Dual Function
51014**

VIP™

The VIP™ has the most functions and customizing options out of our range of lights. With up to eight light settings and countless color combinations, the VIP™ is a worksite necessity. Also available are accessories for further customization.

S.M.A.R.T.
BEACON®

Reverse Polarity Program Switching™

Users are able to double the amount of functions that their VIP is able to perform by simply flipping the battery over. By doubling the functions from the standard four to eight the possibilities are endless.

Mockingbird® Technology

Users are able to record and playback their own unique flashing sequences to their VIPs. Programmable VIPs will have at least one Record and one Playback function. The Record function can be used to set the Playback function to whatever speed or pattern that best fits the application the light is being used for, by sensing and memorizing a flashing sequence from an outside light source (must have a near IR wavelength).
